

**CCR Physician-Scientist Early Investigator Program (PEIP) Research and Goals Statement**

Please consider incorporating responses to the following questions or statements in a document that should be up to three pages in length.

- Why are you interested in PEIP?
- What do you hope to accomplish as a Physician-Scientist Early Investigator and how will participating in the program help you achieve your ultimate career goals?
- Briefly describe the research project that you propose to undertake in the program, including a timeline with interim goals and preliminary data (if applicable).
- Suggest individuals in the Center for Cancer Research, NCI who could serve as appropriate primary mentors for you and your research project. Please indicate if any of these individuals are aware that you are applying to the PEIP or not.

NOTE: It is not necessary for you to have identified a mentor prior to submitting your application.
