

ONCOLOGIC SURGERY CLINICAL TRIALS

OUR SURGEONS

Drs. Jeremy Davis and Jonathan Hernandez are surgical oncologists specializing in gastric, colon, pancreatic and liver cancers at the National Institutes of Health (NIH) Clinical Center in Bethesda, Maryland.

As part of our multidisciplinary approach to patient care, we provide a number of natural history and treatment protocols for cancers. We offer innovative surgical procedures, molecular analysis of tumors and targeted drug therapies.

Our Patients

Patients are provided guidance and assistance with appointments, travel, counseling and social support. We believe it is important to collaborate with our patients' primary care physicians in order to provide expert continuity of care.

We are the nation's federally funded cancer center, making treatment free to those receiving care at the NIH Clinical Center.
